## Twin Female 1.5" **Refueling Valve PF61FTM**

F. I. A. approved Appendix "J" 1.5" Twin Female Refueling Valve PF61FTM. To be used either for the refueling of Race Cars or Motorcycles.

The Twin Valve can be surface mounted directly on a fuel cell or remotely using the detachable 'screw on' Manifolds.

The Twin Valve is used in conjunction with two PF30M Male Refueling Valves (Reference Code 0001RV) and either a Twin Horizontal or Twin Vertical Handle (Reference Codes 0205RH and 0204RH respectively).
